I am IPB University Computer Science graduate, with Software Developer experienced as Backend Engineer. I have experience in internship, projects, and certified courses that prove I am an ambitious person who loves to learn new things. I also have the ability to work in teams and leadership. In addition, I am also adaptive with a far further orientation, this can be seen from my desire to follow the needs of IT in the future such as Cloud Computing which I am currently working on.

Education Level

IPB University – Bogor, Indonesia

Aug 2020 - Juli 2024

Bachelor Degree in Computer Science

- Relevant Courses : Systems Analysis and Design, Computer Systems and Networks, Data Management, Cloud Computing, Software Development
- Final Assignment Title : “Optimalisasi *Backend* Aplikasi Pemantauan dan Pengendalian Kolam Budidaya Udang Menggunakan *Framework* Yii2”

Work Experiences

PROGRAM MATCHING FUND KEDAIREKA 2022 - Hybrid

Dec 2023 – Mar 2024

Backend Developer Researchers

The matching fund program is a application of Plasma Finebubble technology research for shrimp pond wastewater treatment, supported by the Ministry of Education and Culture.

- Developed a Water Quality Monitoring and Controlling System application as a Backend Developer, implementing RESTful APIs for web applications using the Yii2 PHP framework and MySQL databases. Created industry-standard documentation, including UML diagrams, database schemas, sequence diagrams, and API documentation, to support backend development.
- Successfully improved the performance and functionality of the Water Quality Monitoring and Controlling System application by analyzing and comparing multiple endpoints from the previous web application developed using the Laravel PHP framework. This evaluation led to optimized system efficiency and enhanced overall user experience.
- Implemented the Agile Scrum methodology for software development and optimization of research processes, focusing on developing, comparing, and analyzing solutions to enhance project efficiency and effectiveness.

PT Petrolab Services - Bogor, West Java

Sep 2023 - Dec 2023

Backend Developer Intern

PETROLAB Services is a fast-growing analytical laboratory with clients in various industrial sectors including energy, manufacturing, oil, mining, transportation, and lube-oil blending plants.

- Developed an e-commerce application as a Backend Developer utilizing the Yii2 PHP framework. Implemented efficient SQL queries for database controllers and adhered to MVC architecture principles, ensuring a well-structured and scalable application.
- Acquired new skills and experience in PHP frameworks to develop advanced applications, including utilizing SQL for complex database management. Focused on aligning development with company business process requirements, including the quotation process.

ICT IPB - Bogor, West Java

Jan 2023 - Apr 2023

Frontend Developer Intern

SITI IPB is integrated information system implemented within Bogor Agricultural University that serves various information of IPB University

- Enhanced the responsiveness of the SITI IPB landing page by prioritizing usability. Utilized CSHTML for development and implemented Object-Oriented Programming principles to create a more efficient and user-friendly interface.

Related Experience

IEEE IPB Student Branch – Bogor, West Java

Jan 2023 – Dec 2023

Director of Academic Affairs

IEEE student branch IPB is a science technology engineering and mathematics organization established under the auspices of IEEE Indonesian section and Asean Region10 section.

- Developed and organized a one-day academic event in the fields of Science, Technology, Engineering, and Mathematics (STEM) aimed at introducing senior high school students to computer science. Served as Project Officer, representing the Grand STEM TryEngineering winner, and facilitated engaging activities to inspire the next generation of tech enthusiasts.
- Created comprehensive introductory materials on mobile app development, web development, game development, and artificial intelligence, ensuring that the content was current and relevant for senior high school students. Aimed to engage and inspire students by providing them with valuable insights into these dynamic fields.

Bangkit Academy 2023 by Google, GoTo, Traveloka - Hybrid

Feb 2023 - Jul 2023

Cloud Computing Cohort

Certified project and independent study program held by Ministry of Education x Google, GoTo, and Traveloka

- Completed multiple courses in Cloud Computing and Backend Engineering, earning certifications and successfully delivering final projects. Gained hands-on experience with cloud infrastructure and backend development, reinforcing practical skills and technical knowledge.
- Successfully developed 'Tourist Attraction Recommendation App' as a Cloud Computing Backend and Developer, utilizing Express.js for API development and Prisma for ORM database management. Deployed the application using GitHub CI/CD, integrated with Google Cloud Platform for seamless interaction. Led a 6-week project as Project Manager, applying essential project management fundamentals and fostering collaboration between teams.
- Developed a personal landing page as part of an HTML & CSS course, applying advanced layout techniques such as grid and column structures using native CSS. Demonstrated strong front-end design skills while creating a responsive and visually appealing web page.

IT Today IPB 2020/2021 - Bogor, West Java

Dec 2020 - Sep 2021

Frontend Developer

IT Today is a largest annual event organized by the Computer Science Student Association of IPB University

- Designed and developed dynamic landing pages for 'UX Competition', 'Poster Competition', and 'Hack Competition' using HTML, CSS, and Bootstrap. Customized interactivity and user experience with JavaScript, ensuring a responsive and engaging interface for competition participants.
- Implemented GitHub versioning and CI/CD pipelines to deploy a pre-launched landing page for team discussions on design. Facilitated collaboration by enabling real-time access to the landing page, streamlining feedback and iteration processes during presentation sessions.

Skills

- | | |
|--------------|--------------------------|
| • Git | • Node.js |
| • Mysql | • RESTFul API |
| • Laravel | • WebSocket Architecture |
| • Yii2 | • HTML & CSS |
| • Express.js | • Scrum Method |

Projects and Portfolio
